Flatline

I guess some thing just don't turn out so great
But when I met you I thought it, it was fate
But now I see that you and I
Were just a sin and a stupid lie
My hopes have
They've been shattered
I just want my chance for a real romance
And what they, what they say is true
That you were just too
Too good to be true
And now I, I'm trying to breathe
You were choking me
Yes you were

Chorus:

For every breath I took with you
I lost a beat of my heart
It seems I'm dying quickly now
My heart beats slower
Then flatlines

You took me down a one way road
In a loaded round
You shot I was down
Is this what pain really is
To know you're nothing
But someone is something
Please can we just make it end
The memories replay
Just please stay away
It feels like I am drowning
Is it worth to save me tell me

Chorus
